

## Overview

The Secabo LITE and SMART series can now be converted into a convenient double-plate transfer press with the Secabo slide. The stable slide can be screwed to the transfer press in just a few steps. The Slide is based on the well-known Secabo quick-change principle and can be pushed into the respective end positions on the left and right with little effort. A beam adapter is included in the delivery so that the original base plate of the transfer press can continue to be used. Furthermore, all removable plates in the range fit on the slide. These are available separately and can be installed and removed in seconds. Available for the transfer presses TC5 LITE, TC7 LITE, TC5 SMART, TC7 SMART, TS7 SMART, THE BEAST and THE BEAST White Toner, excluding Secabo TCC SMART.
